

# Value chains contribution to the sustainability of socio-ecological systems in Mountain Areas

ONLINE SEMINAR

TUESDAY 26 NOVEMBER, 2024 | 5.30 PM (GMT+1)

## INTRODUCTION

**Prof. Anna Giorgi** - Università degli Studi di Milano, polo UNIMONT

## SPEAKER

**Dr. Michele Moretti** - Dipartimento di Scienze Agrarie, Alimentari ed Agro-ambientali, Università di Pisa

## CONTENTS

In mountain areas, the continuous adaptive interaction between bio-geophysical and socio-cultural processes assembles Socio-Ecological Systems (SES) characterized by a great diversity of ecosystems and land uses, providing substantial support for the livelihoods of mountain communities and essential ecosystem services for uplands and lowlands. During the webinar, taking value chains as an operational unit of analysis to examine the interactions of human-natural systems that mobilize resources to generate economic, environmental and social values, we will characterize the contribution of value chains to the sustainable development of SES.
